Policy Browser Skill: User Documentation

The Policy Browser Skill provides an audible method of navigating policy documents. The skill can also keep track of which sections of a policy the user has accepted or declined.

Getting Started:

Launch the Policy Browser Skill with the following Amazon Alexa command:

"Alexa, open Policy Browser"

Once the skill has launched, the Policy Browser Skill has several different user commands. These commands can be spoken as listed by Alexa, or using the corresponding numeric options. These commands can be spoken at any time while the Policy Browser Skill is active. Although outside of the Alexa phone application or developer console, the wake word *"Alexa"* will need to precede most commands.

Example Usage

User: open policy browser

Alexa: Welcome back to the privacy policy reader. To continue from where you left off say continue, or to hear other options say 1, help, or menu.

User: menu

Alexa: OK, you can tell me 1. 'menu' to listen to this menu, 2. 'table of contents', … or 'quit.

User: two

Alexa: Here are the Privacy Policy section titles. 1. General. 2. Types of Information We Collect From You… 17. Contact Information

User: read section one

List Options

Say: *"menu"*, *"list options,"* *"one list options"*, *"one menu"* or *"one"*.

Functionality: Reads a menu of commands the user can enter in a numbered list.

Table Of Contents

Say: *"two"*, *"table of contents"*, *"two table of contents"*, *"two hear the table of contents"*, *"hear the table of contents"*

Functionality: Reads out the section titles in a numbered list. This will tell the user which section pertains to which number, so they can simply say "read section {number}" to activate the "Start From Section" command with the correct section.

Start From Beginning

Say: *"three"*, *"read from beginning"*, *"three read from beginning"*, *"start from the beginning"*, *"three start from the beginning"*, *"start from beginning"*, or *"three start from beginning"*

Functionality: Reads out the first section of the policy.

Start From Section

Say: *"four"*, *"read section {number}"*, *"four read section {number}"*, *"read section"*, *"four read section"*, *"start from section"*, or *"four start from section"*

Functionality: Read out the current section in the policy or the section specified.

Continue

Say: *"skip"*, *"continue"*, *"five skip"*, *"five continue"*, *"continue from last session"*, *"five continue from last session"*, *"skip section"*, *"five skip section"*, or *"five"*.

Functionality: Continues on to the next section if Alexa is reading a section of the privacy policy or has just finished reading a section of the privacy policy.

Repeat

Say: *"repeat"*, *"six repeat"* or *"six"*.

Functionality: Re-reads the last section of the privacy policy that Alexa began reading.

Accept or Decline

Say: *"accept"*, *"decline"*, *"accept section"*, *"decline section"*, *"accept section {number}"*, *"decline section {number}"*, *"seven"*, *"accept all"*, *"decline all"*, *"seven accept"*, *"seven decline"*, *"seven accept section"*, *"seven decline section"*, *"seven accept section {number}"*, *"seven decline section {number}"*, *"seven"*, *"seven accept all"*, or *"seven decline all"* .

Functionality: Accepts or declines the specified section of the privacy policy. If a number is not given and the user instead says "all", all sections of the privacy policy will be accepted or declined.

Read Accepted

Say: *"accepted sections"*, *"what sections have I accepted"*, *"what are my accepted sections"*, *"eight"*, *"eight accepted sections"*, *"eight what sections have I accepted"*, or *"eight what are my accepted sections"* .

Functionality: Reads a list of the sections in this privacy policy which have been accepted by the user using the Accept or Decline directive.
